web performance

MILESTONES

2014 First program

2019 First server

2020 Started web development

PROFILE

Full-stack web developer who designs and builds fast, reliable web experiences across the stack, from React front-ends to SQL and Firebase back-ends. Self-taught since 2020 and now studying Information Systems at Stellenbosch, I care about the details most people never notice and the performance everyone feels.

EXPERIENCE

Founder & Developer, Mystical Scrolls

2020 – Present

Founded and run an independent web development venture building beautiful, high-performance digital products for clients and personal projects.

- Design and ship end-to-end web apps: front-end interfaces through to Firebase and SQL back-ends.
- Deploy on Firebase Hosting with live contact forms, authentication, and analytics.
- Own the full workflow: UI/UX design, development, performance, and SEO.

SELECTED PROJECTS

Mystical Scrolls: Portfolio & Business Site

Personal portfolio and business site built with vanilla JavaScript on Firebase Hosting, with a live contact form and analytics.

HTML · CSS · JavaScript · Firebase

Additional projects available on request

Client and personal builds using React, TypeScript, and SQL. Portfolio and code samples available on GitHub.
